Practice question for LAB 2

A private investor wants to understand some business dynamics, in order to invest his money. You are hired to advise him on the following questions.

1. Does neighborhood ("which represents location") affect the price of property or not? If yes how? (4 Points)
2. What is the average price for Private room? (2 Points)
3. What is the average price for Entire home? (2 Points)
4. What neibouhood should we focus on to increase our sales? Explain your answer. (4 Points)

   Total 12 Points

Dataset: New York city

Good Luck
